

# Complex engineering in safe hands

## Did you know...

For nearly 20 years Cascade Engineering has been a trusted partner of our OEM and manufacturing clients. While many companies depend on us for separate sections of their project, some realise a greater value from our ability to support and take ownership of projects across the entire lifecycle.

## Beyond Structural Engineering – Complete Project Solutions

75% of our clients depend on CE for:

- **Cross-sector expertise** →  
broader base solutions and innovations together with a new generation of engineers ready to fill any capability gap
- **Early engagement and consultation** →  
proactive engagement prevents costly troubleshooting, often the downfall of complex projects
- **Complete project life-cycle support** →  
cradle to grave involvement and ownership results in more reliable certification especially on innovative projects

- Outlining a critical path to delivery: How we work across sectors and teams
- Pathway to reliable certification
- SMEs at the heart of complex projects: Bringing cross-sector innovation to all our work

# Here's why bringing in a new project partner is worth the time & effort

For a typical project:

## Specialist Skills for Dependable Delivery Across the Project Life-Cycle

### From design beginnings to full-service expertise

Over the past two decades, we have evolved from a design-focused organisation into a full-service partner. Today, 75% of our customers rely on us for seamless support from concept to certification.

DESIGN

ANALYSIS

REALISATION

Every project is unique. We adapt to evolving needs as the project develops so that capacity or capability gaps are a thing of the past.

Decades of experience and skills applied to numerous complex projects at every stage of the project lifecycle mean that whatever the challenge we have the skills and specialisms to deliver success.

If you are interested, you can [meet the team](#) and check out [our approach](#).

*"Most of our clients have worked with us for over 10 years. They've come to depend on us for so much more than the design and FE analysis they used to call us for. Today our business is filled with experience and capability which brings cross-sector, up to date expertise which keeps our clients and partners returning."*
